Dubai, UAE

OBJECTIVE

Accomplished Software Engineer with 5 years of experience in developing and implementing web applications using Java Spring Boot and PHP Laravel. Proven expertise in handling full project lifecycles, from frontend and backend development to server management. Currently contributing to a government organization with a strong track record of delivering high-quality software solutions. Seeking a key role in an organization where my technical skills and problem-solving abilities can drive innovative software solutions and support the company's growth and success.

EXPERIENCE

Software Engineer

Creative City Free Zone Authority (Government Authority) - Fujairah, UAE

April 2023 to Present

- Developed and deployed robust ERP and CRM systems utilizing Java Spring Boot and PHP Laravel.
- Developed and maintained both frontend and backend components, ensuring seamless user experiences and robust server-side performance.
- Managed server infrastructure, including deployment, monitoring, and optimization of cloud services.
- Successfully integrated payment systems and developed data integration solutions for the Ministry of Economy - UAE.
- Learned and worked with platforms and technologies including API Management tools, Microservices, AWS, Jira and Docker.
- Engaged with clients to gather requirements, provide technical expertise, and deliver tailored solutions that meet their business needs.

Software Developer

Zone Delivery Services LLC - Dubai, UAE

March 2021 to March 2023

- Worked with Java Spring Boot and PHP Laravel for development of ERP and CRM software.
- Built REST APIs in Laravel and Spring Boot that served data to front-end to get the information.
- Collaborated with a team of software engineers to refactor the code and reduce the service loading time.
- Developed, tested, debugged and documented software applications.
- Demonstrated the ability to quickly learn and apply new technologies.
